SUMMARY

AI/ML Engineer and Data Science professional with hands-on experience building end-to-end machine learning, deep learning, NLP, Generative AI, RAG, and agentic AI systems. Strong in Python, SQL, Scikit-learn, XGBoost, TensorFlow, PyTorch, LangChain, LangGraph, FastAPI, and production-oriented AI deployment.

EXPERIENCE

Associate Software Engineer – Accenture

Nov 2024 – Mar 2026

- Built Python-based data and AI workflows covering preprocessing, EDA, feature engineering, model training, validation, evaluation, and application integration across structured and unstructured data.
- Developed and evaluated ML/DL and LLM-based solutions using XGBoost, LSTM/GRU, Transformers, prompt engineering, embeddings, and retrieval workflows; tracked accuracy, F1-score, RMSE, latency, and response quality.
- Integrated analytical and AI capabilities through REST APIs; supported testing, debugging, monitoring, documentation, and cross-functional delivery for production-oriented applications.

Full Stack Developer Intern – Arcs Infotech

Jan 2024 – Oct 2024

- Developed MERN applications and REST APIs using React, Node.js, Express, and MongoDB; integrated LLM-powered features while working with databases, authentication, testing, debugging, and Git.

PROJECTS

FinSight AI – AI-Powered Financial Market Intelligence Platform

GitHub

- Built an end-to-end ML/DL pipeline using XGBoost, Random Forest, LSTM, and GRU on OHLCV, technical, momentum, volatility, and volume features with chronological validation and model evaluation.
- Developed FinBERT-based financial sentiment analysis and FastAPI inference with backtesting, portfolio optimization, risk analytics, and interactive model-performance workflows.

Tech Stack: Python, Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow, FinBERT, FastAPI, SQL, Plotly

Synapse AI – Enterprise Multimodal RAG & Agentic AI Platform

GitHub

- Built multimodal ingestion and RAG for PDFs and video using semantic chunking, embeddings, ChromaDB, vector retrieval, metadata, and citation-grounded LLM generation.
- Developed LangGraph routing, retrieval, reasoning, and evaluation agents with tool calling, guardrails, RAGAS, LLM-as-a-Judge, agent tracing, latency monitoring, and FastAPI-based AI services.

Tech Stack: Python, LangChain, LangGraph, ChromaDB, RAGAS, Transformers, FastAPI, Docker, React, TypeScript

TECHNICAL SKILLS

Programming & Data: Python, SQL, C++, JavaScript, TypeScript, Pandas, NumPy, MongoDB, MySQL

Machine Learning & Data Science: Scikit-learn, XGBoost, Random Forest, Regression, Classification, Clustering, EDA, Feature Engineering, Statistical Analysis, Time-Series Analysis, Model Evaluation

Deep Learning & NLP: TensorFlow, PyTorch, Neural Networks, LSTM, GRU, Transformers, Hugging Face, FinBERT, Embeddings, Sentiment Analysis

Generative AI & Agentic AI: LLMs, RAG, LangChain, LangGraph, Prompt Engineering, Multi-Agent Systems, Tool Calling, Vector Databases, FAISS, ChromaDB, RAGAS, LLM-as-a-Judge

Deployment & Engineering: FastAPI, REST APIs, Docker, Git/GitHub, Linux, Model Deployment, Monitoring, Testing, Debugging, React.js, Node.js, Express.js

CERTIFICATIONS

- Machine Learning for Data Science Projects – IBM | Generative AI in Action – IBM

EDUCATION

Bachelor of Technology (Computer Science and Engineering)

Seth Jai Parkash Mukand Lal Institute of Engineering and Technology, Radaur

2020 – 2024

CGPA: **8.5/10**

ACHIEVEMENTS

- Solved **300+** **Data Structures and Algorithms** problems on **GeeksforGeeks** and built end-to-end AI systems spanning data analysis, ML/DL, RAG, agentic workflows, APIs, evaluation, and deployment.
