SUMMARY

Software Engineer with 1.6 years of experience in backend development, AI integration, and scalable application development. Experienced in building RESTful APIs, integrating LLM-powered solutions, and developing machine learning projects involving recommender systems, text mining, and predictive analytics. Proficient in Python, Java, SQL, AWS, and big data technologies with a strong foundation in algorithms and software engineering.

EXPERIENCE

Associate Software Engineer – Accenture

Nov 2024 – Mar 2026

- Developed and maintained scalable backend services using RESTful APIs while integrating AI-powered features into production applications.
- Built backend data pipelines connecting applications with SQL and MongoDB databases, improving API performance and data reliability.
- Collaborated with cross-functional teams to integrate LLM-powered capabilities into client-facing applications following Agile methodologies.
- Improved backend code quality through testing and peer reviews, contributing to nearly **30%** fewer post-deployment defects.

Full Stack Developer – Arcs Infotech

Jul 2024 – Oct 2024

- Developed responsive web applications using React.js, Node.js, Express.js, and MongoDB for business reporting dashboards.
- Improved API response time and optimized SQL/MongoDB queries for better application performance under concurrent load.

PROJECTS

Intelligent Product Recommendation & Insights Platform

GitHub

- Designed a hybrid recommendation engine using collaborative filtering and Sentence-BERT embeddings to generate personalized product recommendations.
- Applied NLP techniques including sentiment analysis, keyword extraction, and text mining to analyze customer reviews and identify product trends.
- Integrated GPT-based summarization using OpenAI API to generate natural-language recommendation explanations.
- Processed large datasets using PySpark and deployed scalable batch pipelines on AWS (S3, EMR).
- Tech Stack:** Python, Scikit-learn, PySpark, Sentence-BERT, OpenAI API, FastAPI, MongoDB, AWS.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), SQL

Machine Learning: Scikit-learn, Predictive Modeling, Classification, Regression, Clustering, NLP, Text Mining, Recommender Systems, Statistical Analysis

Generative AI: OpenAI API, LLM Integration, Prompt Engineering, Sentence-BERT

Big Data & Cloud: PySpark, Hadoop Ecosystem, AWS (S3, EC2, EMR)

Databases: MongoDB, MySQL, SQL

Frameworks: FastAPI, React.js, Node.js, Express.js

Tools: Git, GitHub, VS Code, Postman

Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

EDUCATION

Bachelor of Technology (Computer Science and Engineering)

2020 – 2024

Seth Jai Parkash Mukand Lal Institute of Engineering and Technology, Radaur

CGPA: **8.5**

ACHIEVEMENTS

- Solved **300+** Data Structures and Algorithms problems on GeeksforGeeks.
- Built end-to-end AI applications integrating LLMs, FastAPI, AWS, and recommendation systems.
